"TITLE OF MICRO-PROJECT"

SUBMITTED IN PARTIAL FULFILLMENT OF THE REQUIREMENTS FOR THE AWARD
OF
DIPLOMA IN

Department of Artificial Intelligence & Machine Learning

SUBMITTED TO

MAHARASHTRA STATE BOARD OF TECHNICAL EDUCATION, MUMBAI

NAME OF STUDENT (FULL NAME)	ENROLLMENT NO:
1) HARSHADA NANDUKUMAR KAMTHE	**225P10441**
2) KARTIK PRABHAKAR KAKDE	**225P10560**
3) SWPNIL MADHUKAR KARALE	**225P10611**
4) DIGVIJA TANAJI KARALE	**225P11200**

ZES’S Zeal Polytechnic Pune

ACADEMIC YEAR 2025-26

MAHARASHTRA STATE BOARD OF TECHNICAL EDUCATION

Certificate

This is to certify that Ms. **HARSHADA NANDUKUMAR KAMTHE** Roll No.17 of Third Semester of **Diploma in Artificial Intelligence & Machine Learning** of Institute, Zeal Education Society's Zeal Polytechnic, Pune (Institute Code: 0988) has completed the **Micro Project** satisfactorily in Subject WEB PAGE DESIGNING **(312004)** for the Academic Year 2025-2026 as prescribed in the curriculum.

Place: NARHE,PUNE Enrollment No: 225P10441

Date: …… Exam. Seat No: ……

Subject Teacher **Head of the Department** **Principal**

MAHARASHTRA STATE BOARD OF TECHNICAL EDUCATION

Certificate

This is to certify that Mr. SWPNIL MADHUKAR KARALE Roll No.18. of Third Semester of **Diploma in Artificial Intelligence & Machine Learning** of Institute, Zeal Education Society's Zeal Polytechnic, Pune (Institute Code: 0988) has completed the **Micro Project** satisfactorily in Subject WEB PAGE DESIGNING **(312004)** for the Academic Year 2025-2026 as prescribed in the curriculum.

Place: NARHE,PUNE Enrollment No: 225P10611

Date: …… Exam. Seat No: ……

Subject Teacher **Head of the Department** **Principal**

MAHARASHTRA STATE BOARD OF TECHNICAL EDUCATION

Certificate

This is to certify that Mr. DIGVIJA TANAJI KARALE Roll No.19 of Third Semester of **Diploma in Artificial Intelligence & Machine Learning** of Institute, Zeal Education Society's Zeal Polytechnic, Pune (Institute Code: 0988) has completed the **Micro Project** satisfactorily in Subject WEB PAGE DESIGNING **(312004)** for the Academic Year 2025-2026 as prescribed in the curriculum.

Place: NARHE,PUNE Enrollment No: 225P11200

Date: …… Exam. Seat No: ……

Subject Teacher **Head of the Department** **Principal**

MAHARASHTRA STATE BOARD OF TECHNICAL EDUCATION

Certificate

This is to certify that Mr. KARTIK PRABHAKAR KAKDE Roll No.20 of Third Semester of **Diploma in Artificial Intelligence & Machine Learning** of Institute, Zeal Education Society's Zeal Polytechnic, Pune (Institute Code: 0988) has completed the **Micro Project** satisfactorily in Subject WEB PAGE DESIGNING **(312004)** for the Academic Year 2025-2026 as prescribed in the curriculum.

Place: NARHE,PUNE Enrollment No: 225P10560

Date: …… Exam. Seat No: ……

Subject Teacher **Head of the Department** **Principal**

2) OBJECTIVE

The main objective of this project is to design and develop an attractive and informative web page that displays different favorite food items along with their images and captions. Food is an important part of our daily life, and people enjoy exploring different types of dishes from various cultures and cuisines. Through this project, the aim is to present some popular food items in a visually appealing way so that users can easily understand and enjoy the content displayed on the web page.

Another important objective of this project is to learn the basic concepts of web page designing. By creating this web page, students can understand how images, captions, and text can be arranged properly to create a clean and user-friendly layout. The project helps in developing skills such as adding images, writing descriptions, formatting content, and designing a structured webpage using basic web technologies.

This project also focuses on improving creativity and presentation skills. By selecting suitable images of food items and writing simple captions for each one, the web page becomes more interesting and engaging for viewers. It helps in learning how visual elements and text can work together to provide information in a clear and attractive way.

In addition, the project helps students practice organizing information on a web page. Each food item is displayed with its own image and caption so that visitors can easily identify and read about it. This method makes the web page simple to navigate and understand. It also helps students understand the importance of proper layout and content arrangement in web design.

Overall, the objective of this project is to gain practical knowledge of web page design while creating an informative page about favorite food items. It helps students understand how to combine images and text effectively, improve their creativity, and develop basic skills in designing a simple and attractive web page.

3) PROBLEM DEFINITION

In today's digital world, websites are one of the most common ways to present information in an attractive and organized manner. However, many beginners face difficulties in understanding how to design a simple and well-structured web page. They often struggle with arranging images, adding captions, and presenting content in a clear and visually appealing format. Because of this, learning the basic concepts of web page design becomes important for students who are starting to study web development.

The main problem addressed in this project is how to create a simple web page that effectively displays information about favorite food items using images and captions. Many people enjoy looking at food pictures and learning about different dishes, but if the web page is not properly designed, the information may appear cluttered, confusing, or unattractive to viewers.

Another challenge is organizing the content so that each food item is presented clearly with its image and description. Without proper layout and formatting, the images and text may not align correctly, which can reduce the readability and overall appearance of the web page. Therefore, it is necessary to design a page where images and captions are arranged neatly and are easy for users to view and understand.

This project focuses on solving these problems by creating a simple and attractive web page that displays several favorite food items with images and short captions. The goal is to demonstrate how basic web design techniques can be used to organize visual and textual information effectively.

By addressing these issues, the project helps beginners understand how to structure a webpage properly and present information in a clean, readable, and visually appealing way. It also provides practical experience in using basic web design concepts to solve common layout and presentation problems.

4) INTRODUCATION

Food is an important part of our daily life, and everyone has their own favorite food items. Different types of food from various cultures are enjoyed by people around the world. Many people like to explore and learn about different dishes, especially when they are presented with attractive images and simple descriptions.

This project focuses on creating a web page that displays some favorite food items along with their images and captions. The purpose of this webpage is to present information in a simple, clear, and visually appealing way. Images help attract the attention of viewers, while captions provide short information about each food item.

By designing this webpage, students can learn the basic concepts of web page design such as arranging images, adding captions, and organizing content properly. This project also helps improve creativity and presentation skills while learning how to create a simple and attractive webpage.

5) BLOCK DIAGRAM

6) HARDWARE/SOFTWARE/TOOLS USED

- Hardware Used:

  *Computer / Laptop
  *Keyboard
  *Mouse

- Software Used:

  *Text Editor (Notepad / Notepad++ / VS Code)
  *Web Browser (Google Chrome / Microsoft Edge)

- Tools Used:

*HTML (HyperText Markup Language) for creating the structure of the webpage
*CSS (Cascading Style Sheets) for designing and styling the webpage
Internet for collecting images of food items

7) STEP-BY-STEP METHODOLOGY

1) Topic Selection – First, the topic “Favorite Food Items” was selected for designing the web page.
2) Collecting Information – Images and short captions of different food items were collected from the internet.
3) Creating HTML File – A new HTML file was created using a text editor like Notepad or VS Code.
4) Designing the Webpage – The structure of the webpage was created using HTML tags such as headings, images, and paragraphs.
5) Adding Images and Captions – Images of favorite food items were inserted and short captions were written below each image.
6) Styling the Webpage – Basic CSS was used to make the webpage more attractive and properly arranged.
7) Testing the Webpage – The webpage was opened in a web browser to check whether images and captions were displayed correctly.
8) Final Output – The final webpage displayed different favorite food items with images and captions in a clear and attractive layout.

8) OBSERVATIONS & RESULTS& CONCLUSION

Observations:

- All selected food items were displayed clearly with their images and captions.
- Images were properly aligned, and captions were easy to read.
- The layout of the webpage was simple, neat, and visually appealing.
- Users could easily identify each food item and understand the information provided.
- The combination of images and text made the webpage engaging and informative.

Results:

- A fully functional web page was created that successfully showcases favorite food items.
- The project demonstrated the effective use of HTML and CSS for designing a simple webpage.
- The webpage met the objective of presenting content in an organized and attractive manner.
- Students gained practical experience in web page design and learned how to combine images with captions effectively.

Conclusion:

The project was successful in achieving its goal of creating a simple, clear, and attractive web page that displays favorite food items with images and captions. Users found it easy to navigate, visually appealing, and informative.

WEEKLY PROGRESS REPORT

MICRO PROJECT

SR.NO.	WEEK	ACTIVITY PERFORMED	SIGN OF GUIDE	DATE
1	1st	Discussion and finalization of topic		
2	2nd	Preparation and submission of Abstract		
3	3rd	Literature Review		
4	4th	Collection of Data		
5	5th	Collection of Data		
6	6th	Discussion and outline of Content		
7	7th	Formulation of Content		
8	8th	Editing and proof Reading of Content		
9	9th	Compilation of Report And Presentation		
10	10th	Seminar		
11	11th	Viva voce		
12	12th	Final submission of Micro Project
